ANDREAS STIGSBØL KRÜHLMANN

CITY: Copenhagen NATIONALITY: Danish EMAIL: andreas@kruhlmann.dev

EXPERIENCE

MAY 2023 - SEP 2026
Software Engineer, Siemens Mobility A/S

- Spear-headed AI training sessions for roughly 50 colleagues across the organization.
- Developed KPI metrics dashboard for the S-Bane using Python, FastAPI and PostgreSQL.
- Desgined and implemented departure screen software for the Greater Copenhagen light rail using Rust and WebAssembly, including systems-level control of sensors and IO devices.
- Created metrics dashboard for light rail rolling stock to track key metrics using InfluxDB2 and MQTT.
- Leveraged Microsoft Graph/Identity platorm and Entra ID to improve incident response time and authentication flow in new and existing projects.
- Assigned mentor for six student workers, focusing on refactoring, software design principles and working effectively in existing production codebases.

FEB 2019 - MAY 2023
4 years
Data technician apprentice, Siemens Mobility A/S

- Developed railway infrastructure systems for the Danish S-Bane, primarily focusing on a data warehouses using Python and Java.
- Designed and implemented deployment strategy for the Oslo metro using IaC with Terraform.
- Defined CI/CD standards for new projects, covering artifact generation, external-service authentication, testing, documentation generation and linting.

FEB 2015 - FEB 2019
4 years
Student worker, Siemens Mobility A/S

- Developed software solutions for in-house customers to improve intra-organizational workflows, including VB6 MS Excel macros, web services using Python/FastAPI/Flask and a native Android app.

JUL 2015 - MAR 2017
2 years
Technical author, Packt Publishing

- Co-authored "Building a 3D Game with LibGDX", covering 3D game development topics for intermediate Java developers.

MAR 2012 - AUG 2013
1 year
Full-stack developer, Copenhagen Judo

- Built enrollment website for the Danish national judo team to coordinate attendance and tournament sign-ups using the XAMPP stack.

EDUCATION

JAN 2018 - MAY 2023 Data technician (spec. programming), **TEC**, Ballerup

SKILLS

Process & Standards	ISO27001, Cyber Resilience Act, GDPR
Technical leadership	Mentoring, Code Review, Pair-Programming, CI/CD
Engineering	Refactoring, TDD, DDD, Secure by Design, BDD, Agentic Coding

TECHNOLOGIES

Primary	Rust, Python, TypeScript, SQL, Linux, Docker, CI/CD, Git, POSIX Shell, REST, FastAPI
Experienced	PHP, Java, React, Svelte, WS, MQTT, Redis, Grafana, PostgreSQL, Data-Oriented Design
Learning	Lua, C, C#, OCaml, WebAssembly, Azure, C++, Haskell, Ruby

LANGUAGES

Danish	Native
English	Native
German	Basic
